## Animal magic

Our carefully selected pet-friendly fabrics make living with your pet even more relaxed. To achieve this, we set high standards for their durability and easy care.

No matter what kind of pet, this collection is clearly more suitable for pets than our conventional upholstery fabrics.

Your pet-friendly upholstery fabric is just a stone's throw away.

## Animal magic - **pet-friendly**

With our pet-friendly fabrics, we would like to protect your piece of furniture from damage caused by your pet.

Using the snag test BS8479:2008, we have simulated the abrasion caused by claws with a test needle, thus assessing the thread formation on the fabric surface.

Compared to our conventional cover fabrics, the pet-friendly fabrics have proven to be more resistant and pet-friendly.

## Animal magic - **enduring**

Choose our pet-friendly fabrics for long-term enjoyment of your upholstered furniture.

Our pet-friendly collection is equipped with high characteristics in durability, rub fastness and light fastness.

With high utility qualities for a relaxed life together.

3

### Animal magic - **durability**

Choose one of our strong paw fabrics.

With a pet in the house, the upholstery fabric of your sofa should also be extremely tough. With the help of the Martindale test according to DIN EN 12947-2 it is possible to simulate natural abrasion of upholstery fabrics. Most of our pet-friendly fabrics reach nearly 100,000 abrasion cycles.

The combination of high abrasion and snag test values makes our pet-friendly fabrics more durable than our conventional upholstery fabrics.

4

### Animal magic - **easy care**

Oopsi?!?

A „little accident“ can happen quickly with a pet in the house.

That's not a problem. Liquids can be easily absorbed with a dry, absorbent cloth. The polyester fibres do not absorb liquids. Thus, the fabric is easy to clean and bacteria can spread less.

Simply more hygienic.

5

## Animal magic - hair free

Does your pet lose a lot of hair?

No problem! Our pet-friendly fabrics are designed to prevent your pet's hair from getting caught in the fibres on the surface of the fabrics. You can remove most of the hair by simply vacuuming the upholstery fabric with an upholstery nozzle on a low level.

In the blink of an eye your sofa will be almost hair-free.

6

## Animal magic - certified

Our furniture and upholstery fabrics have been awarded the RAL quality seal, the „Golden M“ and the Oeko-Tex 100 standard.

We meet the high requirements of the German Furniture Association (Deutsche Gütegemeinschaft Möbel e. V. ) regarding quality, environment and safety.

Our cover fabrics have been thoroughly tested, only the best for your pet.

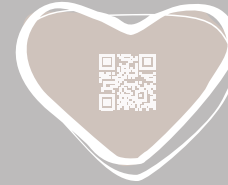

## **Our tip**

Do not leave your pet unattended with your furniture.

We do not give any warranty or guarantee that your suite covered with one of our „pet-friendly fabrics“ will not be damaged by your pet in any way.

Please note the usage and care instructions in the product information that comes with your suite.
